Invoice reference/PO #		Project-ID	

Sample material

* Is Realtime RT-PCR ordered in addition to histopathology/microbiology:		<input type="checkbox"/> Yes	<input type="checkbox"/> No
* Fish species:		* Sampling date	
Project ID		Generation	Fish group
<input type="checkbox"/> We do not want the sample material to be used in anonymous form for research or for development of new methods.			

Histopathology

* Tick the box for required product			
<input type="checkbox"/> Whole fry	<input type="checkbox"/> Whole fry, up to 10 fry < 3 cm or up to 25 fry < 1 cm	<input type="checkbox"/> Organ package*	<input type="checkbox"/> Organ package*, 5 fish
<input type="checkbox"/> Single tissue	<input type="checkbox"/> Single tissue, 10 pcs	Numer of samples:	
* Full organ package includes gill, pseudobranch, heart, liver, spleen, kidney, pylorus including pancreas, and muscle w. skin.			
Special staining and immunohistochemistry are offered upon request			

Microbiology

* Type of sample material			* Information about sample material		
<input type="checkbox"/> Primary streak	<input type="checkbox"/> Secondary streak	<input type="checkbox"/> Swab sample	Incubation period:		
<input type="checkbox"/> Bacterial culture	<input type="checkbox"/> Tissue	<input type="checkbox"/> Other:	Temp °C	<input type="checkbox"/>	Chilled
* Medium					
<input type="checkbox"/> Blood agar	<input type="checkbox"/> Blood agar w/salt	<input type="checkbox"/> Marine agar			
<input type="checkbox"/> Ordals medium	<input type="checkbox"/> MicrobeVision, transport medium	<input type="checkbox"/> Other:			
* Tick the box for required analysis					
<input type="checkbox"/> Sample material inquiry, 5 fish (1 organ, 2 media) **			<input type="checkbox"/> Sample material inquiry, 1 fish (1 organ, 2 media) **		
<input type="checkbox"/> Sample material inquiry, fish with ulcers, 5 fish (2 organs, 2 media) **			<input type="checkbox"/> Sample material inquiry, fish with ulcers, 1 fish (2 organs, 2 media) **		
<input type="checkbox"/> Environmental sample (swab sample in transport medium or streak on plate from swab)			<input type="checkbox"/> AMR-testing		
** When selecting «Sample material inquiry» there will be done an evaluation of relevant colonies for further examination. If there are streaks from several different species, these will be divided into different cases based on organ and medium. Cost of sequencing can be added after conferring with the customer.					

For internal use

Mottatt dato og tid:		Mottatt av:		Bring returlappnr.:	
Rapport nr.:		Kommentar:			

For histopathology- and microbiology samples the pots/plates must be labelled with fish no. (i.e. F1, F2 etc.).

Fish no./ sample no.	Type of sample material/ tissue	Healthy	Moribund	Dead	Microbiology, plate labelling	Histopathology, pot labelling	Comments

Anamnesis/description of disease situation:

- Clinical signs / necropsy findings
- Course / extent
- Appetite
- Tentative diagnosis
- Other (treatments etc.)

Delivery time / Terms and Conditions

We encourage our customers to register all samples electronically before submitting the samples.

We highly recommend to always take our parallel PCR-samples when sampling for histopathology, in order to avoid suspicion of notifiable disease based on histopathology alone.

For microbiology samples the delivery time will depend on the growth rate of the bacteria.

- Standard delivery – 5** workdays
 * **Urgent delivery – 2** workdays
 * **Urgent delivery – 24** hours
 Project according to agreement

* With Urgent delivery (2 days and 24 hours), an additional charge will be added

** Urgent delivery 24 hours must be approved upon request

Sampling guides and order forms, in addition to general Terms and Conditions can be found at our website: www.pharmaq.com/en/analytiq/. By submitting samples the customer accept our Terms and Conditions.
